PINCH-GRAB
PINCERS

卷料切割機擁有專利的進料系統，可以準確地移動夾具，並確保進料時材料的平整。搭配上真空吸附系統，即使是高速度的作業流程，或是多層的材料切割都沒有問題。

Covered by international patent, the "pinch and grab" feeding system assures maximum material fixing. The back movable pincer assures maximum feeding accuracy while the front one is fixed and together with vacuum system grants the perfect material fixing during cutting even with high speed operation and multi-layer processing.

SYSTEMS

簡易的卷料上料系統，方便上料與進料設計。

To ease the loading and feeding operations optional devices are available to handle materials in rolls.

整合排版管理系統
JOB MANAGER

Job Manager：獨家系統統整，可以單機排版也可以做切割中心統一排版、派工管理，不同於其他廠牌使用複製功能排版，ATOM 採用多張訂單同材共斬、混刀排版設計，能有效節省材料，提升機台使用效率。

JobManager: Individual system integration, which can nesting on a single machine or assign jobs from the cutting center to different machines. ATOM has the functions of cutting multiple orders with the same material and mix sizes on a layout, which can effectively save material and increase the utilization of machine. These are different from the copy function of nesting used by other brands.
